

Active Number OPEN MORNING

Active Number is a whole-school approach to the teaching and understanding of number and operations to primary aged pupils. It uses the principles of mnemonics, intended to assist the memory, to develop "mastery", providing a deepened understanding of number and calculation using the four operations.

It is proven that learning gained by doing through interacting with others, supports retention. Using images, actions and verbal reasoning the child's learning develops using a spiral approach.

The Active Number has proven impact within both the lead school and beyond and is also supported by the current EEF guidance reports for supporting mathematics in key stages two and three.

Nick Gibb MP, Minister for State for School Standards, on praising how 2018 maths assessments showed that

"Following the use of Active Mathematics from Years One to Five within our setting, 100% of pupils reached or exceeded the expected standard by the end of Key Stage 2 in 2018."

Our 2019-20 opening mornings:

- Tuesday 8th October 2019
- Tuesday 14th January 2020
- Tuesday 10th March 2020

VENUE:

Witham St Hughs Academy

AGENDA

- | | |
|---------------|--|
| 9.30 | Refreshments on arrival |
